

System Overview

Locking Systems

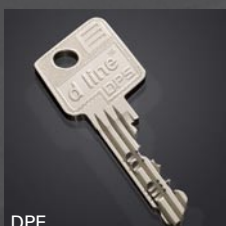

d line

3KS
3-Curve-System

- locking elements free of springs; therefore high wear resistant and impassible against dust and ice
- highest protection against key duplication: organisational protection, patented and highest technical protection
- security rating according to EN1303:2005 (key related security grade 6, attack resistance grade 2)
- standard picking and drilling protection against manipulation and standard bypass methods and resistant against bump key method

- easy cylinder modification (length modification, knob changing, or change from double to single cylinder)
- highest diversity of cylinder types (Euro profile, English oval, RIM, padlock, screw-in, Scandinavian Oval, ...)
- available in KD (Keyed to differ), KA (Keyed alike), MK (Master Keyed), GMK (Grand Master Keyed) and GGMK (Great Grand Master Keyed)
- security card included

DPE
Double Profile Extended

- six undivided sliders ducts with 1 additional cross profile and 1 extended key control for a high security pin tumbler system
- high protection against key duplication: Organisational protection, patented and high technical protection
- security rating according to EN1303:2005 (key related security grade 6, attack resistance grade 2)
- standard picking and drilling protection against manipulation and standard bypass methods

- easy cylinder modification (length modification, knob changing, or change from double to single cylinder)
- huge diversity of cylinder types (Euro profile, English oval, RIM, padlock, screw-in, Scandinavian Oval, ...)
- available in KD (Keyed to differ), KA (Keyed alike), MK (Master Keyed), GMK (Grand Master Keyed) and GGMK (Great Grand Master Keyed)
- security card included

DPS-5 and DPS-6
Double Profile System

- different keyways with 5 or 6 divided pins with an additional cross profile for double key control
- protection against key duplication: Organisational protection, patented and high technical protection
- security rating according to EN1303:2005 (key related security grade 6, attack resistance grade 2)
- in compact or modular version (DPS-5 also in a compact and modular mix) for easy cylinder modification (DPS-6 only compact version)

- huge diversity of cylinder types (Euro profile, English oval, RIM, padlock, screw-in, Scandinavian Oval, ...)
- available in KD (Keyed to differ), KA (Keyed alike), MK (Master Keyed), GMK (Grand Master Keyed) and GGMK (Great Grand Master Keyed)

ALS-5 and ALS-6
Adapted Length Profile

- different Keyways with 5 or 6 divided pins and an additional adapted profile on the key tip
- security rating according to EN1303:2005 (key related security grade 4, attack resistance grade 2)
- protection against key duplication: Organisational, patented protection
- euro cylinders in compact version

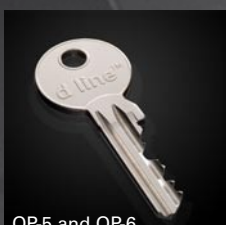

- great diversity of cylinder types (Euro profile, English oval, RIM, padlock, screw-in, Scandinavian Oval, ...)
- available in KD (Keyed to differ), KA (Keyed alike), MK (Master Keyed), GMK (Grand Master Keyed) and GGMK (Great Grand Master Keyed)

GPI-5 and GPI-6
Basic Profile System

- different conical key and keyway with 5 or 6 pin chambers with multiple overlaps
- standard picking and drilling protection against cylinder manipulation
- security rating according to EN1303:2005 (key related security grade 4, attack resistance grade 2)
- euro cylinders in compact version (shortest side 27/27 mm)

- great diversity of cylinder types (Euro profile, English oval, RIM, padlock, screw-in, Scandinavian Oval, ...)
- available in KD (Keyed to differ), KA (Keyed alike), MK (Master Keyed), GMK (Grand Master Keyed) and GGMK (Great Grand Master Keyed)

OP-5 and OP-6
Open Profile System

- unrestricted key profile, one keyway
- euro cylinders in compact version (shortest side 27/27 mm)
- great diversity of cylinder types (Euro profile, English oval, RIM, padlock, screw-in, Scandinavian Oval, ...)
- available in KD (Keyed to differ) and KA (Keyed alike), not for master key systems
